

*Our Community Care website and the reports available on or linked from that website contain statements that are forward-looking statements within the meaning of the federal securities laws. These forward-looking statements include, without limitation, our goals and aspirations related to environmental, social and governance (ESG) matters and diversity and belonging, such as the percentage of our patients choosing to dialyze at home and our future renewable energy use, carbon emissions and water use. All statements on our Community Care website and related reports, other than statements of historical fact, are forward-looking statements. Without limiting the foregoing, statements including the words "expect," "intend," "will," "target," "goal" and similar expressions are intended to identify forward-looking statements. These forward-looking statements are based on DaVita's goals and aspirations as of February 22, 2023 and it may be difficult to achieve many of the Company's ESG goals during the desired timeframes or at all. DaVita undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of changed circumstances, new information, future events or otherwise, except as may be required by law. Actual future events could differ materially from any forward-looking statements due to numerous factors that involve substantial known and unknown risks and uncertainties. These risks and uncertainties include, among other things:*

- evolving regulatory requirements affecting ESG standards, measurements and reporting requirements; the availability of suppliers that can meet our sustainability standards; and our ability to recruit, develop and retain diverse talent in our labor markets;*
- the continuing impact of the COVID-19 pandemic, current macroeconomic and marketplace conditions, and global events, many of which are interrelated and which relate to, among other things, the impact of the COVID-19 pandemic on our patients, teammates, physician partners, suppliers, business, operations, reputation, financial condition and results of operations; the government's response to the ongoing pandemic; the pandemic's continuing impact on the U.S. and global economies, labor market conditions, interest rates, inflation and evolving monetary policies; the availability, acceptance, impact and efficacy of COVID-19 vaccines, treatments and therapies; further spread or resurgence of the virus, including as a result of the emergence of new strains of the virus; the continuing impact of the pandemic on our revenues and non-acquired growth due to lower treatment volumes; COVID-19's impact on the chronic kidney disease (CKD) population and our patient population including on the mortality of these patients; any potential negative impact on our commercial mix or the number of our patients covered by commercial insurance plans; continued increased COVID-19-related costs; our ability to successfully implement cost savings initiatives; supply chain challenges and disruptions; and elevated teammate turnover and training costs and higher salary and wage expense, including, among other things, increased contract wages, driven in part by persisting labor market conditions and a high demand for our clinical personnel, any of which may also have the effect of heightening many of the other risks and uncertainties discussed below, and in many cases, the impact of the pandemic and the aforementioned global economic conditions on our business may persist even after the pandemic subsides;*
- our ability to attract, retain and motivate teammates and our ability to manage operating cost increases or productivity decreases whether due to union organizing activities, legislative or other changes, demand for labor, volatility and uncertainty in the labor market, the current challenging labor market conditions, or other reasons;*
- our ability to successfully implement our strategies with respect to integrated kidney care and value-based care initiatives and home based dialysis in the desired time frame and in a complex, dynamic and highly regulated environment, including, among other things, maintaining our existing business; meeting growth expectations; recovering our investments; entering into agreements with payors, third party vendors and others on terms that are competitive and, as appropriate, prove actuarially sound; structuring operations, agreements and arrangements to comply with evolving rules and regulations; finding, training and retaining appropriate staff; and further developing our integrated care and other capabilities to provide competitive programs at scale;*
- legal and compliance risks, such as our continued compliance with complex, and at times, evolving government regulations and requirements;*
- our ability to develop and maintain relationships with physicians and hospitals, changing affiliation models for physicians, and the emergence of new models of care or other initiatives*

*introduced by the government or private sector that, among other things, may erode our patient base and impact reimbursement rates;*

- continued increased competition from dialysis providers and others, and other potential marketplace changes, including increased investment in and availability of funding to new entrants in the dialysis and pre-dialysis marketplace; and*
- the other risks factors, trends and uncertainties set forth in DaVita Inc.'s Annual Report on Form 10-K for the year ended December 31, 2022 and the risks and uncertainties discussed in any subsequent reports that DaVita files or furnishes with the Securities and Exchange Commission from time to time.*
